

# finalists Dining Room

## Dalia Canora Design, LLC

Interior designer and builder Dalia Canora was in the sheetrock stage of building this Arts & Crafts home in Darien when it was purchased by a couple with three young children who were planning a move back from London. Their builder became their designer when they asked Canora to tackle the interiors of the home as well, including this fun, fresh dining room. Though the rest of the home is scaled back in terms of color, Canora's client wanted to be a little more adventurous in this space, and chose a palette of purple and silver to get that "wow" factor she wanted. Plush purple Thibaut dining chairs with contrast welt and silver legs are luxurious and functional, and quilting on the head chairs adds a touch of texture. A silvery wallpaper, also from Thibaut, resembles birch trees, and the Currey & Co. light fixture lends a smoother sparkle. To make the room ready for entertaining, a sideboard gives the family all the storage and surface space they need. -AK
